EXAMINER'S COMMENT

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's IDS submission filed on 27 December 2007 has been entered.
2. The previously made Examiner's Amendment appears below since applicant has not provided a current complete listing of the claims reflecting the changes made by the previous Examiner's Amendment with the request for continued examination.

EXAMINER'S AMENDMENT

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Gary P. Oakeson on September 12, 2007.

The application has been amended as follows:

In claim 1, line 5, the term "ii)" has been replaced with the term "iii)".

Also in claim 1, line 5, the phrase "in a zwitterionic state" has been inserted between the term "amino" and the comma.

Further in claim 1, line 6, the term "iii)" has been replaced with the term "iv)".

Lastly in claim 1, line 6, the phrase "in a zwitterionic state" has been inserted between the term "surfactant" and the semi-colon.

In claim 4, delete line 5 in its entirety and replace with the phrase "cocoamphopropionates, sulfobetaines, alkyl amine dicarboxylates, polyglycol ether".

Also in claim 4, delete line 9 in its entirety and replace with the phrase "cocoamphodiacetates, alkyliminodipropionates,".

In claim 7, line 2, a period has been inserted after the term "wt%".

In claim 13, line 7, the term "ii)" has been replaced with the term "iii)".

Also in claim 13, line 7, the phrase "in a zwitterionic state" has been inserted between the term "amino" and the comma.

Further in claim 13, line 8, the term "iii)" has been replaced with the term "iv)".

Lastly in claim 13, line 8, the phrase "in a zwitterionic state" has been inserted between the term "surfactant" and the semi-colon.

In claim 17, delete line 4 in its entirety and replace with the phrase "cocohydroxysulfo betaines, cocoamphodipropionates, cocoamphopropionates,".

Also in claim 17, delete line 9 in its entirety and replace with the phrase "cocoamphodiacetates, alkyliminodipropionates,".

In claim 20, line 2, a period has been inserted after the term "wt%".

Reasons For Allowance

4. The following is an examiner's statement of reasons for allowance: This application teaches a black ink-jet ink comprising: (a) a liquid vehicle including (i) water, (ii) a cosolvent, (iii) a solubilized naturally occurring amino acid in a zwitterionic state, and (iv) from 0.01 wt% to 2 wt% of an amphoteric surfactant in a zwitterionic state; and (b) a black colorant solubilized or dispersed in the liquid vehicle, such that the black ink-jet ink has improved optical density on bright white paper or improved bleed control when printed against a non-reactive color ink-jet ink on bright white paper, both when compared to a similar black ink-jet ink being identical to the black ink-jet ink except that it is devoid of the naturally occurring amino acid in favor of added water and a method for printing the above black ink-jet ink. The closest prior art is US Patent No. 5,507,865, issued to Yoshida et al., which teaches an aqueous ink jet ink composition comprising 0.1-20% by weight of a water-soluble dye, preferably a black dye, 0.01-20% by weight of a basic amino acid such as arginine, lysine, histidine, ornithine and derivatives thereof, water and optionally an additive such as surfactants which may be added for their normal functions but fails to teach or fairly suggest that both the amino acid and the surfactant are present in the zwitterionic state as claimed by applicants.

Accordingly, this application is allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
